Prediction Details

Report ID	#11	Date	2026-07-21
Recommended Crop	Kidneybeans	Soil Status	Excellent
Fertilizer	Nitrogen Fertilizer, Phosphorus Fertilizer, Potassium Fertilizer	Soil Score	90%

Report Info

Report ID #11
Generated 2026-07-21
Status Excellent

Input Parameters

Nitrogen (N) 22.0 kg/ha	Phosphorus (P) 5.0 kg/ha	Potassium (K) 6.0 kg/ha	Soil pH 6.4
Temperature 8.0 °C	Humidity 7.5 %	Rainfall 200.0 mm	

Water Management

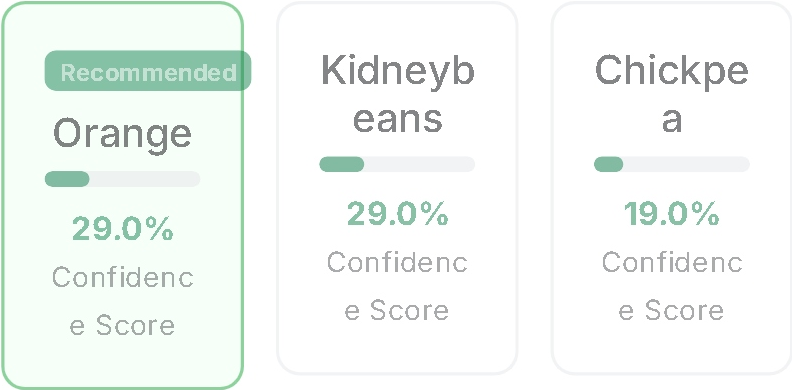

3.5

L/m² per day

 Irrigate lightly every 2–3 days and reassess soil moisture.

This estimate uses submitted temperature, humidity, and rainfall as a planning aid, not a

Top Crop Recommendations

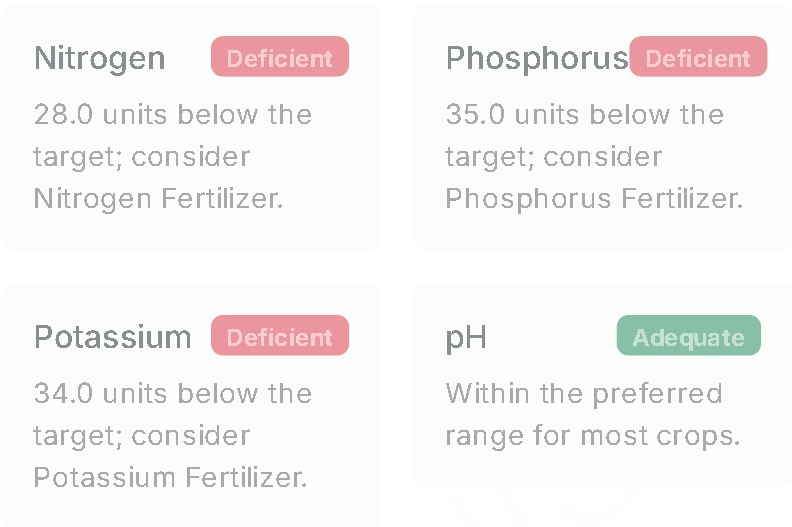

replacement for field moisture measurement.

 Smart Suggestions

- ✓ Use mulch or crop residue to reduce evaporation and protect soil structure.
- ✓ Recheck soil nutrients before each major fertilizer application.
- ✓ Add compost, green manure, or neem cake gradually to improve nitrogen availability.

 Nutrient Analysis

 Fertilizer Plan

-  **Nitrogen** (Deficit: 28.0 units)
Correct a 28.0-unit soil-test deficit
Organic alternative: well-composted manure or neem cake
-  **Phosphorus** (Deficit: 35.0 units)
Correct a 35.0-unit soil-test deficit

 Yield Potential

71.7%

Low confidence level
Potential combines soil-health score and model crop confidence. Actual yield requires local yield records, area, cultivar,
